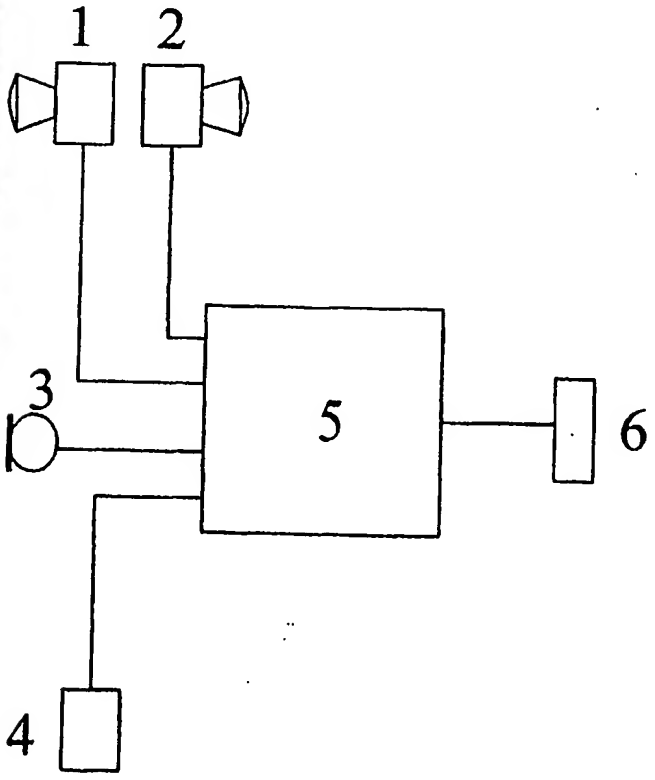
(54) Title: A SYSTEM FOR COMPUTER ASSISTED DRIVING LESSONS



(57) Abstract: A system for computer assisted driving lessons, including a first camera (1) directed forward in the driving direction, a second camera (2) directed at the pupil's eyes as well as recording situations behind the vehicle, a sensor (4) for position data, a processing unit (5) arranged for synchronously storing the signals from the cameras (1,2) and the sensor (4). Recordings are made at predefined "difficulty" places along a driving route. The recordings can be displayed later in a "summing up" session with the pupil.
